DRINKING WATER ADVISORY FOR STELZER COUNTY PARK

Drinking Water Tested Positive for Presence of E.Coli and Total Coliforms

The Department of Environmental Health has issued a drinking water advisory for Stelzer County Park because water collected for routine sampling tested positive for the presence of total coliforms and E.coli bacteria.

Warning signs advising people not to drink the water were posted today around the park, located at 11470 Wildcat Canyon Road in Lakeside.

The drinking water advisory will be rescinded once the well and distribution pipes are disinfected and water samples show the absence of bacteria.

For more information about Stelzer County Park, contact District Park Manager Randy Ford at (858) 694-3963.
